Ankur Gangwar | **ankurgangwar4575-tech**

Education

- **Motilal Nehru National Institute of Technology Allahabad** *2024-2028*
  Bachelor of Technology in Chemical Engineering CPI Till 4th Sem : 9.17/10
- **New Age Public School, Bilaspur** *2022-2023*
  Class XII, Central Board of Secondary Education, Uttar Pradesh Percentage: 96.50%
- **New Age Public School, Bilaspur** *2020-2021*
  Class X, Central Board of Secondary Education, Uttar Pradesh Percentage: 97.16%

Key Projects

- **E-Commerce Growth Analytics** *August 2026 - September 2026*
  Co-developed an end-to-end machine learning platform and business intelligence dashboard for E-Commerce analytics
  - **Tools & Technologies Used:** Python, Scikit-learn, LightGBM, FastAPI, React, Tailwind CSS, TypeScript
  - Engineered and deployed LightGBM models to predict order return risks and dynamically segment customers
  - Built a scalable REST API to serve machine learning models to a responsive, real-time React dashboard
  - Enabled proactive identification of high-value customers to optimize marketing spend and reduce logistics costs
  - Optimized a LightGBM model to achieve 96.9% ROC-AUC and 83.5% PR-AUC on an E-commerce dataset

  Live Demo **GitHub Repository**
- **SpendSmart — Full Stack Expense Tracker** *May 2026 - June 2026*
  Developed a comprehensive expense tracking platform with real-time budget monitoring.
  - **Tools & Technologies Used:** MongoDB, Express.js, React.js, Node.js, JWT, Google OAuth.
  - Authentication: Built secure user login using JWT access tokens and Google OAuth integration.
  - Data Aggregation: Implemented MongoDB pipelines for real-time income, expense, and budget alerts.
  - Dashboard: Developed a responsive React UI with Chart.js for interactive financial visualizations.

  Live Demo **GitHub Repository**
- **MarioMind – Deep Reinforcement Learning Agent** *July 2026 - August 2026*
  Developed a Deep Reinforcement Learning agent to play Super Mario Bros. using Double DQN
  - **Tools & Technologies Used:** Python, PyTorch, Gymnasium, Double Deep Q Network
  - State Processing: Converted game frames to 84×84 grayscale images and stacked 4 consecutive frames
  - Model: Built a CNN-based Q-network and implemented Double DQN for stable Q-value learning
  - Achievement: Enabled autonomous Mario gameplay through reward-based Double DQN learning

  GitHub Repository

Technical Skills

Programming Languages: C++, Python, JavaScript, TypeScript, SQL
Frontend: React.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth 2.0
Databases: MongoDB, MySQL
Machine Learning: PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib
Developer Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook

Areas of Interest

Artificial Intelligence and Machine Learning, Data Science, Software Development, Object Oriented Programming, Database Management Systems, Operating Systems, Data Structures and Algorithms, Competitive Programming, Web Development

Positions of Responsibility

- **Marketing Team Member,** Computer Coding Club *October 2025 - Present*
- **Event Management Team,** Chem X Club *April 2026 - Present*

Achievements

- Solved 1000+ Data Structures and Algorithms problems across various platforms
- Secured Global Rank 3759 in LeetCode Weekly Contest 473 ***View Rank***
- Secured Global Rank 403 in CodeChef START225D ***View Rank***

Coding Profiles

- **LeetCode** - 700+ problems | Max Rating: 1596 ***ankur01-02***
- **CodeForces** - Pupil | 500+ problems | Max Rating: 1227 ***ankur009***
- **CodeChef** - 2 Star | Max Rating: 1444 ***ankur01-02***
- **GeeksForGeeks** - 350+ problems ***ankur02***
